Toka Salah Shaban

Cairo, Egypt | toka22salah@gmail.com | 01119672174 | Portfolio | Toka Salah | toka190

Professional Summary

Frontend Developer with hands-on experience in building responsive web applications using React.js and JavaScript (ES6+). Currently learning Flutter for cross-platform mobile development. Experienced in creating interactive educational content and delivering freelance projects. Passionate about writing clean, maintainable code and turning ideas into functional interfaces.

Technical Skills

Frontend: React.js, HTML5, CSS3, JavaScript, Bootstrap
Mobile (Learning): Flutter, Dart
Backend: PHP, Spring Boot (basic), Java
Databases: MySQL, PHPMyAdmin
Tools & Concepts: Git, GitHub, MVC, OOP
Design Tools: Figma, Canva
Microsoft Office: Word, Excel, PowerPoint

Education

B.Sc. in Computer Science & AI — 2021 – 2025
Helwan University, Cairo, Egypt | GPA: 3.24/4.0 (Very Good)

Experience

Flutter & Web Development Instructor | NTG Clarity — Nov 2025 – Present

- Teaching Flutter and web development fundamentals to students
- Guiding learners through hands-on projects and real-world coding exercises
- Preparing course materials focused on practical application

JavaScript Content Developer | Innovatera — Jun 2025 – Sep 2025

- Developed interactive JavaScript content and coding exercises for programming courses
- Created practical examples and real-world scenarios to teach modern ES6+ concepts
- Designed educational materials used by learners to strengthen their frontend skills

Frontend Developer | Freelance Projects — 2022 – Present

- Delivered responsive web applications using React and JavaScript for real clients
- Translated client requirements into clean, functional interfaces
- Managed project timelines and ensured cross-browser compatibility

Frontend Development Trainee | Codveda — Aug 2025 – Sep 2025

- Completed training in React.js and modern frontend practices
- Built hands-on projects to strengthen component-based development skills

Data Analysis Trainee | DEPI — Present – Expected Dec 2025

- Learning data analysis fundamentals and visualization tools
- Working with datasets to extract meaningful insights

Web Development Trainee | Information Technology Institute (ITI) — Aug 2023 – Sep 2023

- Completed intensive PHP-based web development course
- Built CRUD applications using MySQL and MVC architecture

Projects

Movie Ratings App (React & OMDB API) | Codveda Training Github Repo

- Built responsive React app fetching real-time movie data from OMDB API
- Implemented search with real-time results and loading states
- Designed clean movie cards displaying ratings, year, and plot

Graduation Project - Pet Caretopia Github Repo

- Developed full-stack platform for pet adoption with AI breed detection
- Frontend: React.js & Bootstrap – Backend: Spring Boot & MySQL

vaxSchedular - Veterinary Dashboard Github Repo

- Built full-stack management system using Spring Boot and MySQL
- Implemented authentication and role-based access control

Weather App (React) Github Repo

- Created weather dashboard fetching live data from OpenWeatherMap
- Practiced API integration and dynamic UI updates

Heart Disease Prediction Model Github Repo

- Built ML classifier using KNN & Naive Bayes (86% accuracy)
- Implemented with Scikit-learn and visualized results

Sky News UI Github Repo

- Developed clean, responsive news interface using HTML/CSS/JS
- Focused on layout design and visual hierarchy
